

## Position Announcement

### Public Sector ERP Project Manager

GovHR USA is working with an international public accounting, consulting and technology firm to seek candidates for a public sector ERP Project Manager.

The position will help lead and manage the delivery of public sector ERP implementations, as well as scoping and creating fixed fee proposals for ERP public sector implementations. The position could work out of the Chicago office or from another urban center. Previous public sector consulting experience is required.

The firm has a growing national ERP implementation practice and has been successful in building the market for airports, transportation authorities, lotteries, and other public sector agencies throughout the United States, and is looking to aggressively grow this practice. The government ERP implementation practice offers a strong path to partner or director within the firm.

#### **Application Process**

Candidates should apply with a resume and cover letter at:
